TITANIC TWINS

LOVE TO SPARE

Susie is very young, but she has definitely been around, as they are wont to say about skilled and sensuous women of all ages. Susie is experienced, in a word, and experience with the male beast is never in short supply for a gal as well endowed as our

juggernaut. That's right, tender as this tit-heavy morsel is, she has had her share of gentleman callers. They have sweated betwixt her powerful, silken thighs, and they have left the token

of their virility in each of her sensuous orifices, but the ointment that continues to make Susie's short life full to the brim with warty, stiff, and spraying macho hose, is her chest meat. Susie has love to spare. She is so well built

in the breastly area that she can easily and very comfortably service to full satisfaction two males at the same time. One large gland is actually too much for the average male to deal with -- they simply wallow in greed hunger as Susie lowers the broad tip into their parched gorge.

Soon they are full and they begin to blubber, whine, and grow tired. Susie flicks their limp and thoroughly drained vestige about on the end of one of her skilled fingers, and the sucking beast lumbers off to sleep, his mind packed and stuffed with the images of the meaty feast he has just consummated. Susie is satisfied as well, and she knows that with love to spare, she will remain so.
